Ed,

This is to provide you with a revised map for our agreement concerning the Westbank Site. If you have any questions, please email or call me at 214-665-8045.

Jim

Subject: Fw: Westbank Asbestos map Updated Boundary

The Site boundaries have been determined by combining visual inspections done in the past, file review, past and present aerial photography, and relating those to the current maps on Jefferson Parish's Web Map for parcel information. The Johns Manville Plant is bordered by Steel Street on the east, River Road on the North and the railroad tracks on the south. The western boundary corresponds to the western edge of Lot JM-1 and a historic aerial photography depicting the Site. Included as part of the Plant boundaries is the Riverside Landfills located on across River Road from the Plant on the river side of the levee. This area was determined from a comparison of the aerial photograph, past visual inspections of the landfills, and the Parcel information for that area. The northern boundary is the Mississippi River, the eastern boundary is the eastern edge of Lot T, the southern edge is River Road, and the western boundary is the western edge of Lot R. The JM Landfill was also determined from a comparison of the aerial photograph, past visual inspections, and the Parcel information for that area. The northern boundary is the railroads tracks, the eastern boundary is Eiseman Avenue extending to the railroad tracks, the southern boundary is 4th Street, and the western boundary is the western edge of Lot Lb.
